Title:

Comments: Hello

This project is a total disaster for Montana and this area. Why would the US Forest Service let something like this happen. This area should be protected at all costs. This lake, property and most of all, the wild life should be preserved for all future generations. This project should not even be considered. The project will completely destroy this area, any person with a brain can see that.

This project should be stopped Immediately, Period!

Anyone who would let this project proceed should be fired Immediately!

Wake Up People!

Thank You
