Comments: To whom it may concern,

I do not support the expansion of the Holland Lake Lodge facility, or the construction of any new structures within the Holland Lake watershed. It is the responsibility of the Forest Service to care for all land within their jurisdiction and serve all people. All land, not just the land that is undesirable for development. All people, not just those that can pay. To approve the proposed developments would be an abdication of the duties of the Department and an injustice to our beautiful state of Montana.

Thank you for your time,

A concerned US citizen.
