Comments: I enjoy the campground at Holland lake. The families with cabins and leases have discussed the strict footprint requirements that they must follow. I find now that there must be a different set of rules for commercial development. The lodge is small and does not impinge on the family atmosphere. It is my understanding the USFS is mandated to serve the people so that forests will be utilized by the community. How does building a commercial venture which will benefit the stockholders who no doubt are incentivized by profit not preservation be of value to campers and cabin owners. We enjoy the opportunity to appreciate the natural beauty of Holland lake unencumbered by noise . If this allowed to progress a beautiful area of the west will be desecrated. We need to protect this jewel for our children and grandchildren. Please deny this building permit. Keep Holland Lake for the people not the oligarchs.
