Comments: I am against this expansion and commercialization of the Holland Lake facilities. Modernizing to accommodate current usage would be acceptable, but dramatically increasing the capacity and adding more creature comforts will attract an even more urban flavor of "nature tourist", irreparably change the nature of the site and surroundings, and have an undue impact on wildlife. This is a very poor kind of public-private partnership, where public and natural interests are sold off to benefit commercial interests. We need less of this.
