Comments: To the US Forest Service and Decision Makers,

This is abhorrent. Please do not succumb to the list for income and revenue generation. This will remove access almost entirely to local Montanans. We are already suffering at the hands of out of state money and "playground" mindset. Removing access through development continues to strip and degrade Montana of all of the things that make it wonderful. I beg you, do not do this. Keep it the last best place. Keep it the way that is accessible to all Montanans no matter their status or economic power.

For all Montanans, please consider this.

Sincerely,

Arielle Allen
