Comments: Projects such as this cannot be allowed on taxpayers land. Our beautiful state is being slowly turned over to private entities, and it is our future generations that will pay the price. I have had many adventures to our wonderful mountain lakes with my family over the years. The cost of allowing something such as this project to move forward will forever change the face of Holland Lake. Please do not let this project move forward. Do not let this corporation lease our lands. Block them from any future leases.
