Comments: I oppose the "improvement and expansion" of the Holland Lake Lodge. Our country is changing and change can be hard but good, but it can also be short sighted and detrimental. Though the change in this case may not be more than a blip in history, it will gravely affect the history and access for locals. If we, and even worse our public agencies, keep allowing pressure on Montana's landscape, water aquifers, wildlife habitat and public safety and rights, there will be no turning back. Please consider Montana first and how viable private business is second. They have a choice and if it isn't a viable business as is with minor upgrades then it is their choice to say no thanks. Please consider the long term effects for our wonderful communities who may just pray and fight to stay small. Thank you.
