Comments: I know progress is inevitable, but we can manage our progress wisely.

This is utter exploitation of public lands and as more and more unfettered wealth finds its way here to Montana we have the right and the duty to refuse to allow them to run over the top of Montanans who worked hard to help the state vibrant. These big outfits care nothing about the environment, the wildlife or people - only profits. Do not approve this ,we have to preserve what we have left. Let them build and continue to destructor Colorado or California. We have a small toehold here in Montana of wild places, wild public places let's hang on to this- we do not need them here to start the rapid destruction of our pristine places we can never get them back.
