Comments: My first thought is "why hasn't the public been informed about this until now"? Why is the comment period? Why is the USFS pushing this through so quickly? I work for a company who has to deal with getting right-of-way from the USFS and I know it takes a very long time. Sounds like someone is getting their palms greased over this! Approving this project is going to absolutely ruin Holland Lake! We Montanans have to stand up for our state and say NO! What I have seen and read about this project makes me angry that the USFS would even consider it! The beauty of Holland Lake will be lost forever if POWDR is allowed to tear out trees and expand buildings, roads, etc. Do you really think this isn't going to negatively impact the Lake? Regular Montanans just want to keep places like Holland Lake natural, affordable, and accessible for us. The idea that you are even considering infuriates me! Have you even visited with local residents? From what I'm reading, NO ONE wants this - other than the people making money on it. Who in the USFS is benefitting from this deal? You have MANY questions to answer to the people of Montana!!
