Title:

Comments: Please don't let this cooperation build a resort on our beautiful lake. I would hate to see our forests overrun by tourists. This will damage our land even more than it already is. Not to mention the risk of fires during fire season. People who don't live here don't understand what it takes to make our land beautiful. And what about the wildlife that lives up there? Where are they going to go? It's bad enough that you're euthanizing wildlife that show up in town. They were here first! I think this is a bad move, and in the end it will destroy our pristine wilderness.
