Comments: There are somethings that once destroyed they can not be replaced. The beauty of MT, historic buildings and quiet forest habitats for our wild animals are a few. Allowing projects such as this, demolishes all three. Please do not allow this, we are losing so much daily. Think of the future, the generations who will be in love with MT, the big sky place with its wide open spaces, mountains and plains. Quit letting developers destroy that, piece by piece, chunk by chunk. Like addressing climate changes, we owe it to our future generations.
