Title:

Comments: This project is an abomination that would ruin an area that has been enjoyed by locals for generations. I cannot believe that the National FOREST Service would allow destruction of forest and natural resources enjoyed by Montanans for a for-profit enterprise by an out-of state group with no interest in care or preservation of the land beyond exploiting it for their own profit. There is no chance that the building and occupancy density proposed in this project would not negatively impact the environment in this area. Please do not allow this project to continue.
