Comments: Holland lake is a very special place to my family and I. We have been visiting the lake since I was in first grade. Holland lake is known for its clear waters and beautiful views. Continuing with this project would sacrifice the environment immensely. Polluting the air and disrupting the wildlife would begin with construction of tearing down the old and brining in the new. This project would bring thousands of tourists to this small Montana treasure which in turn will cause the wildlife to move out, the waters to become less clear, the fish would be diminished, a higher chance of trash laying around. There are hundreds of lakes that could withstand this size project. Holland Lake is not one of them.
