Last name: Valett

Organization:

Title:

Comments: This project will greatly alter the character and wildlife of the entire area. Concerns about construction stormwater control, long-term alterations to wildlife corridors and water quality are at issue. The entire complex will need to have a more robust Public Water Supply with a trained certified operator which it currently does not have. I am against this serving of the well to do with the loss of this tranquil low footprint, family-friendly lodge.
