Title:

Comments: I'm off 4th generation Montana, My daughter fifth, grandkids 6th. I am really starting to resent out of staters for sure. And how can the Forest service approve this I don't understand it. Maybe there needs to be some structure or reconstruction for sure because of the age and upkeep, but making this little peice of heaven on earth a place for more people to erode the roads, pollution, traffic, The noise level of that many cars and people, boats, this makes me so sick this could possibly happen. We hike to falls every year and try to camp as much as we can up there, already have noticed a change because of the ownership of the people that are there. Please if it has to change due to the people with more money than the know what to do with, please no extensive expansion!
