Comments: It is slim pickens in MT right now with space we are "allowed" to go as it is. And especially spots with a lake, river, anything that we can just go and be. We really dont want our state to be gobbled up by huge corporations not even from MT?! Bigger isnt always better, especially in this case. Will there even be enough people to "work" this hideous proposal- and for the wealthy out of staters? UGH look what is happening to places like Flathead, cant find people to work as there is no place to live. This is a disgusting proposition -- NOPE
