Comments: The historical buildings at Lake Holland should be listed on the National Register of Historical Landmarks of places to visit to enjoy Lake Holland as the jewel in the wild as it is! The beauty of nature in its natural state to be enjoyed by many as the early settlers in this place of beauty valued. It should NOT be bulldozed down and replaced with modern commercialization that destroys the back to nature, the wildlife that lives in the area will be run off, and the todays trash will come and ruin the beauty that was the reason it was built for in the first place!! Doing inside the building updates should all that be allowed and the Historical buildings remain as they are, with NO more building permits allowed! Your in the National Forest to enjoy nature! NOT to bulldoze and ruin the natural beauty of THE NATIONAL FOREST!!!
