Comments: PLEASE, PLEASE, PLEASE do not tear down this jewel of a lodge ! It truly has been our favorite place on earth...We need MORE of this type of remote lodges , not less. There are too many large , slick places today and not enough quiet get aways....

Yes, Montana has become the "go to" spot, but in my opinion that will change if the landscape changes from rural to fancy and slick...No one wants to connect Montana to that image.

Thanks for listening to me.

Galen
