Title:

Comments: I've been following the Holland Lake redevelopment process and I need to speak out against this project. This is a beautiful area that has been enjoyed by my family since it was originally settled by my great grandfather in the early 1900. This lodge, the campsites and the pristine lake offer people from around the world the absolute best that Montana has to offer. The impact of a project this size destroys the beauty that the people of Montana cherish.

Have environmental studies been done by the developers from Utah? Were the impact studies done by local companies who understand the impact that this development will have on the wildlife and crystal clear lake that this area is known for?

Your vote should be against this project. Out of state investors are looking to make a profit from this project and given the size of the redevelopment knowingly don't care about the environmental impact and what a loss this will be to the State of Montana.

Vote Against this Project.
