Title:

Comments: Anyone who knows me well, knows that this is my favorite place on earth. Where I spent many summers and autumns at our family cabin. A place where you can truly unplug. You can see every star in the sky on a clear night and hear the waterfall softly roar in the background.

A resort would change everything, and not in a good way. To name just a few negatives: light pollution (no more stars on clear nights), noise pollution, increased lake traffic, displaced wildlife, destroyed eco-systems...

There are so few places left on this earth like holland lake. Please think twice about destroying it.
