Comments: It is without saying that development of a resort of such magnitude will in fact destroy the ecosystem and would definitely not contribute to the green movement our country is desperately trying to pursue. If we look at all the surrounding areas that already have established large resorts, casinos, any place that attracts tourism. More times then often, business plans like these bring, disruption, violence, destroying innocent animals, litter, noise and light pollution, I can go on. Please have the generational awareness to preserve our lands and to cancel this violating thought to construct this already doomed financial escapade. Thank you all for considering.
