Comments: It is hard for me to understand why the USFS would even consider this project. We in Montana want to maintain our public lands, as the wonderful places they are. Unless I am mistaken that is the job of the USFS, to maintain our public lands! These huge corporations are here for ONE thing... money. They could care less about the environment, how they negatively impact the area, or the local people these projects negatively affect. This proposed project will destroy Holland Lake forever... why? To line the pockets of investors and to give the elite a fancy (very expensive) bed to come to. I am 100% against this project!
