Comments: I have enjoyed time in the Seeley Swan Valley for many decades, including Holland Lake. I've hiked to the falls, swam in the lake, rode horses, and stayed in the lodge. It is very naive of anyone to believe that this proposed development won't adversely effect everything that makes Holland Lake the gem that it is. Water quality, solitude, wildlife, and plant life will all be adversely affected. Vehicle traffic, boat traffic, dust, and noise will all increase. Maybe Montana could lead the way by not commercializing one of the places that make it special. If it's not broke don't fix it! Come on USFS do the right thing!
