Title:

Comments: The thought of this project greatly upsets not only myself, but many other residents of the great state of Montana. We all grew up on these beautiful, and untouched lands. Be it camping, hunting, fishing, or just enjoying a day out on the lake. That is one of the reasons why this state is the greatest state in the Union.

Throughout the years I've seen our forests and lakes get sold and extorted by corporations who have no intention of preserving what few states have left. The thought of future generations not being able to experience what all of us were so lucky to have been able to experience greatly troubles me. I hope all who read this and have the ability to have the final say in this decision take a second to think and reflect on what this project would entail and the effects of such a decision. Say no to this project. Not only to preserve our Montanan way of life, but to preserve future Montanan's way of life for many generations to come.
