Title:

Comments: Our family is 100% against this development. It will effect both the fauna and flora of the area for generations to come . What research has been done to protect the water quality? Many endangered species or near endangered species frequent the area and what has been done to protect them ? Forest Service land is of and for all US citizens to use and enjoy in a respectful manner, not come in and clear cut and pave to your hearts content. It raises a question for sure that someone needs to follow the money trail from Powdr inc to the pockets of those in the Forest Service who are trying to quickly approve this project without proper care and consideration to all those effected , both nature and man .
