Comments: Have you been to Holland Lake? I am a lifelong Montanan and have been coming to the lodge since I can remember. As an adult in my twenties I had my honeymoon there and a family reunion and it was then that I met Christian and the place was instantly one of my favorite places on earth. I've visited for pleasure and also as a place to heal. The Lodge needs so much work to sustain and without Powdr it will slowly disintegrate. I've seen other places this family owned company has developed and I can guarantee they will preserve the very spirit of this natural beauty. The whole Valley will see the benefit of having better infrastructure and access to this beautiful place. It needs powerlines road improvements and greater access to the public and that is what powder and tends to do. Having employee housing on site will be a game changer for the success of any business that tries to run there. I could not be more excited to see a company come in and develop a little piece of heaven on Holland Lake Lodge's property. It is sorely needed and extremely anticipated. The plan for the property will absolutely maintain a blended in natural setting. That's the beauty of the project. It'll just be much easier to enjoy with some help.
