Comments: I'm not 100% against this but, good lord, if you are going to do something like this, do it right. Do the environmental review. Why the effort to sneak it through? This is a special and fragile place. The lake is already tough to swim in during the summer because of "swimmer's itch" due to the human impact. Not sure how you imagine this is going to help. Do the darn thing right and stop trying to push these things through, Kurt.
