Comments: Development just for developments sake is not okay. I am not opposed to business I am opposed to the lack of Confederated Salish & Kootenai tribes involvement into this proposed tourism development project. The delicate balance of Holland Lakes ecosystem and future cannot be trusted in the hands of those whose end goal is profit. Creating more luxury lodges increases the lack of equity and access to natural, wild spaces for those who could benefit in a meaningful way.

I wish the forest service would consider more creative options, bringing partners to the table that can foster this special place for generations to come. Instead of turning Holland Lake Lodge into more inaccessible luxury lodges.
