Comments: As a boy me and my family use to go to Holland Lake as well as Holland Lake lodge all the time. I also frequent this hike when returning home to visit my parents. It is truly a beautiful location and if there was a proposed development there it will completely destroy the pristine setting that has been enjoyed by people from all over for many years. This is not a location to create housing which will impact the natural habitat of many wildlife as well as the ecosystem. It is a location to remain somewhat undeveloped to keep with the current natural habitat. The lodge may be outdated and could be updated, but that doesn't mean to use this as an opportunity to develop the lake and eventually ruin the entire area for everyone. Who wants to visit a lake filled with houses!! This is completely unacceptable and I am adamantly against this proposal.
