Comments: First off, do not allow this land to be privatized and taken out of public access. Public access to Montana lakes is critical. Please do not permit POWDR to develop Holland Lake to the density levels proposed of 32 buildings and 13000+sq ft lodge. This is far too invasive for the lake area and surrounding area and the proposed density will undoubtedly cause wide spread damage to the lake, it's eco system & the ecosystem of surrounding area. Extreme care must be taken with whatever plan is finally formulated but public access, as Montanan's have had for generations, is critical to any proposal
