Title:

Comments: Parking lots, buildings, fiber optics, is that what you want Montana to represent? This is a monstrosity. As a Californian who worships the forest of Montana, I cry when I think that Holland Lake may be butchered. There are other places that they can ruin that won't cause such a natural catastrophe. An environmental impact statement should be required. You are the steward of Montana's unspoiled gifts, of this forest, of this lake. Generations from now will look back on videos of Holland Lake before you allowed money to be more important than history and nature. Please do not allow this abomination to be built. Keep Montana's natural treasures as pristine as possible.
