Comments: Though I am for updating the space so that it is safe, I am not ok with a private group getting to uses prime forest service land to create a resort. The map takes a small camp area and turns it into a resort on a lake that forest service should be protecting. The plan takes away from the already shrinking wild shoreline and paves a big chunk of the land. This land was sat aside for preservation of forest not so a company with a land lease can use prime public land to make a fortune.
