Comments: As a life long user of the great outdoors, it is important for future generations to have access and experience wilderness areas. It is our responsibility to protect our legacy at all costs. The Holland Lake improvements and expansion plan needs your full attention and due diligence by requiring environmental impact studies to determine the appropriateness of this grand project. The impact on wildlife, fisheries, noise, water quality, and land use may result in continued generational impact that we may learn to regret. I fear that our nation's great wilderness is being consumed by corporate greed. It is my hope that you will ask for Environmental Reviews and protect our nation's wilderness for generations to come.

Thank you for your consideration.
