Title:

Comments: A categorical exclusion for this project would be unsubstantiated and wrong. There needs to be a full environmental impact statement and consideration for endangered and threatened species. Land leases are NOT privately owned land, they are public land on loan. No leasee should be given a free pass to do the extensive construction and expansion that is being proposed in this project without proper environmental assessment and full consideration of public consensus. As a tax paying public land owner I am against the development on Holland Lake by HHL/POWDR.
