Comments: I would like to comment on the proposed development at Holland Lake. I feel there has not been adequate time to study the effects that this would have on the lake, area and our State. It seems like quite a large project that may not adequately address the issue of traditional Montana culture and values. I am concerned that this will negatively alter those values that we Montanans hold dear. I would like to see some evidence that the proposed development, on public land, benefits the people of Montana.
