Comments: Holland lake is a beautiful and serene setting that Montanans and travelers from other states have the tremendous opportunity to enjoy in its current state without the undue influence of commercial interests that this development represents. Everyone should have the chance to enjoy holland lake in its current relatively quiet and relaxing state. This development would dramatically and irrevocably change this beloved area from a quiet reprieve from the commercial and modern pressures of daily life to a busy, loud reminder of what you went to the forest to escape. Please deny or severely restrict proposed changes in order to preserve what some many people love just the way it is.
