Title:

Comments: As a life long Montanan I am concerned about the increasing changes and commercialization of many of our favorite natural locations, parks, and lakes. While I realize that we cannot stop progress, I would request that rigorous analysis be done in an Environmental Impact Statement so that any future changes would be completed in the most responsible way possible. I would like any plans to allow locals to still be able to afford to continue to stay and recreate at this state treasure. Thank you for your consideration in this manner.
