Comments: I have just learned about the proposed project on Holland Lake with company POWDR. I extremely DISAPPROVE the proposed project. The integrity of the lake as well as the surrounding area will be vastly changed and destroyed. This historic lodge had been a momentous lifeline to the Swan valley area. With this new project to take place, it will change this extraordinary icon to a more modern, fast pace, city complex, changing and destroying this hidden gem. In addition, removing the many (#200) huge old growth trees to make room for future structures as well as placing fiber optic lines down the highway corridor, is not keeping with Montana ways or lifestyle. If Internet is needed.....go to the city!!!! Many of the trail systems surrounding Holland lake border the Bob Marshall Wilderness area.....this too will have a negative impact on the area. What environmental reviews have been?How will this development effect the lake and the ecosytem??? How is this even possible on Forest Service land.....government property without a full review being done.
