Comments: It is very upsetting to see this is going to turn into a resort. There needs to be studies done to see how it will affect the area. There is no way that it won't affect it in a negative way. We need to keep the rustic ways. Changing this changed what out state is about. It would increase the people going there. With the increase of people increases pollution. This needs to not happen. And to find out this was known about for months but it is just now released to the public for comment is not ok.
