Title:

Comments: Giving permission to a business to open a private resort including building on public land is contrary to what the Forrest Service is supposed to do. This would exclude the majority of people from using the area that normally would be able to. How about opening up forrest for MORE public use instead of closing roads and leasing prime locations to the extremely wealthy. How about re-opening all the roads that have been closed so the general public can have access to harvesting all the beetle killed trees? How about having the rangers clearing trails instead of harassing campers? No wonder the agency is better known in Montana as the Forrest Circus.
