Comments: This is not an upgrade/update! This is a corporate land grab for profit that will line investors pockets and contribute little to none to the local economy while impacting it and the natural resources around it in multiple negative ways. The Forrest Service should do more to protect these areas, instead they will lease out our lands for next to nothing. This is why I cringe everytime I have to pay one fee or another to access state/Federal lands on top of taxes. If a regular Joe Blow tried this he would be buried in red tape and paperwork. I do not live in Montana but love to visit. These are the gems I love to enjoy. There are places in Montana that no longer feel like Montana, please don't make this one of them!
