Comments: I do not approve any developments of the Holland Lake Lodge area. The purpose of National Forest is to keep the forests in their most natural and true form. Development of this area will change that drastically. Construction traffic, noise, and commotion will disrupt wildlife in the area. This could be detrimental to migratory patterns and habitats of the creatures currently living in the area. This area should be kept as natural and as wild as possible, preserving nature as it is meant to be. Development of this area only serves the wants of humans, and does not take into consideration the drastic effects that will damage the ecosystem.
