Comments: I've been on this lake ever summer since I was born. I am 20 now and I've had some of the best experiences of my life in this lake. My grandparents have a house very close that has been a family hun for decades. This project would destroy holland lake. It would create a setting in which the lake is overcrowded and uncomfortable. This project is not sustainable or ethical. I'm begging whoever is listening to consider the ramifications of a project of this magnitude on a small lake like this one. Please reconsider building on this lake.
