Comments: The scope of this project for Holland Lake is absolutely appalling. As a born and bred Montanan I can't even imagine why you would want to screw up this gem of our state with a project of this magnitude.. The clandestine approach of limiting public comment to such a short amount of time is a giant red flag. This area is cherished because of its charm and remoteness and turning it into a big lodge of this scope will ruin the area forever. What about our wildlife? What about our bear habitat? Where are all the studies that need to be done? It's absolutely heart wrenching that this is even on the table. Montana is being destroyed and it is a travesty. This project is shameful.
