Comments: I don't agree that this lodge should be allowed to expand without proper environmental testing just like I wasn't allowed to build on my Forrest land/ timber tax land without proper protocols and approvals. With this lodge being on national Forrest land there should SURELY be protocols in place to protect Forrest land from further building, so how is it that their building plans have not been questioned? I agree with upgrading the lodge and remodeling but not with adding this many new buildings and enlarging at such capacity. Thanks
