Title:

Comments: Leased land by Holland Lake needs to maintain the pristine woodlands. A huge out-of-state company needs to show respect for the location and wildlife just next to the Bob Marshall. Damage to the area by high level construction- cutting trees, parking lots and overcrowded facilities will create a domino effect and damage the ecosystem in the wild area. We respect our woodlands and need to maintain high percentage of wild lands for wildlife.

We are a state which must preserve our National forest. It's crooked and greedy to have it any other way. Federal Forest is ours to care for...No Disneyland in Montana!
