Comments: Holland lake and the surrounding area holds large amounts of historic value. The plan to demolish these historic buildings and develop a lodge targeted to the wealthy class will serve to ruin the history, push wildlife away from the area, and forever change the area. This area of Montana remains one of the few areas not overrun by traffic and human influence on the natural landscape. Additionally, the proximity to the Bob Marshall Wilderness area allows for pristine wildlife and natural habitat that will be negatively affected with the development that is not justified by simply looking to increase commerce.
