Comments: I am a 4th generation Montanan. I've been able to travel all across Montana and enjoy the lakes we have in the mountains. I definitely do not want a resort deep in the mountains. It will be nothing but noise pollution, and more air pollution for one. We need to leave our mountains in the most natural way possible. There are too many unknown factors behind these kinds of things when it comes to the environment. Even if this was another 4th or 5th gen Montanan doing this I would still be against it. I really do not want to see the mountains of Montana become like California or Colorado mountains, or even Utah. Please, if you value the way we live, do not let Montana become a true story Yellowstone.
