Comments: I can't even put into words the disgust I feel at the Holland Lake Project. When are we going to start protecting our beautiful state? The wildlife already has nowhere to go with all the new housing so haphazardly being built almost throughout the state! I demand to see the studies that were done to show the impact on the surrounding areas. We Montanans are done with being pushed around by those following the almighty dollar and I truly thought the Forest Service was above this!
