Comments: Again we face big corporations exploiting our planet and the beautiful state of Montana. I was born in Missoula 69 years ago. Holland Lake was our big vacation every summer . Now I have my family that enjoys the beauty of Holland Lake. Montana, the last best place of beautiful outdoor recreation. People visit this state to enjoy the unspoiled wilderness . We go to the forest , to rest our minds and feed our souls . The forest service is the Shepard of protecting our wilderness, that is there job ! The wilderness is home for the many animals, who are necessary to keep the balance of nature healthy . We employ the forest service to protect our natural resources and health of our planet .I feel it is totally unexceptal for big corporate money to buy up precious pristine property and turn it upside down for profits. Holland Lake does not allow for this huge development that will have a huge impact on the health of the lake . It is so wrong on ever level for the forest service (the protectors of public land) to slyly push this development ,knowing the destructive impact of this big development. Shame on you ! Keep our forest happy and healthy, so we all can have the opportunity to escape our busy live and be able to go and rest our minds and feed our souls in nature. A resort of this size has nothing to do with the connection of nature . If people want to enjoy our state, then they need to enjoy and respect it naturally . Otherwise , big money will exploit every inch of natural wilderness for the money ! We the people need to get loud against the big money exploiters
